What’s New for ASQ:SE-2™

Jane Squires, Ph.D.
Diane Bricker, Ph.D.

Webinar objectives

• Describe ASQ:SE-2 and social-emotional screening
• Highlight changes and new features
• Show samples of ASQ:SE-2
• Q&A
What is ASQ:SE-2?

• Parent-completed questionnaires that reliably identify young children at risk for social or emotional difficulties
• Screens 7 key behavioral areas—self-regulation, compliance, adaptive functioning, autonomy, affect, social-communication, and interaction with others

Importance of social-emotional screening

• Ability to regulate emotions and have positive interactions with others are critical for school readiness and overall success in life
• Early treatment of social-emotional concerns is key
How was ASQ:SE-2 developed?

- Developed as a complement to ASQ, a developmental screening tool
- Work started in 1995 at the University of Oregon
- Developers reviewed other standardized tests and studied the literature extensively
- First edition was published in 2001; second edition will publish in 2015.

Goals for 2nd edition

- Extend the age range
- Develop new items that directly target social-emotional, early communication, regulatory, and autism spectrum disorders (ASD) behaviors
- Update format to make more user-friendly
- Update normative sample to reflect more diverse population in U.S.
- Add monitoring zone
What’s new?

- 2 month questionnaire
- Expanded age range: 1–72 months
- New data and cutoffs
- Monitoring zone
- New behavior and communication items
- Updated questionnaire design
- Item and response refinements
- Revised Spanish translation
- Quick Start Guide
- Learning Activities book in 2016

2 month questionnaire

- Screens children
  1 month, 0 days to
  2 months, 30 days
- 16 scored items, 3 overall items

Sample items:

*When you talk to your baby, does he look at you and seem to listen?*

*Do you and your baby enjoy feeding times together (breast or bottle feeding)?*
**Expanded age range**

- 1 month–72 months
- Now screens children through kindergarten
- No gaps between questionnaires
- 9 questionnaires—2, 6, 12, 18, 24, 30, 36, 48, and 60 months
- 60 month questionnaire screens children 54 months, 0 days–72 months, 0 days

**Updated cutoff scores**

- New standardization study—14,074 children
- Total number of completed questionnaires—16,424
- Sample mirrors the U.S. population in terms of race/ethnicity and includes all socio-economic groups
- Data collected between 2009 and 2011
- All new cutoff scores
Technical data

- **Reliability**
  - Test-retest: .89 (excellent)
  - Internal consistency: .84 (excellent)

- **Validity**
  - Investigated with more than 2,800 children
  - .83 (excellent)

- **Sensitivity**
  - .81 (excellent)

- **Specificity**
  - .83 (excellent)

Monitoring zone

- Added to help with score interpretation
- Similar to monitoring zone in ASQ-3
- Scores close to the cutoff
- 65th percentile cutoff score

---

2. **ASQ:SE-2 Score Interpretation**: Review the approximate location of the child’s total score on the scoring graphic. Then, check off the area for the score results below:

- The child’s total score is in the area. It is below the cutoff. Social-emotional development appears to be on schedule.
- The child’s total score is in the area. It is close to the cutoff. Further assessment with a professional may be needed.
ASQ:SE-2 and autism

- Behavior and communication items are designed to elicit parent concerns that may point to autism and early communication issues
- Focus is on reciprocity, smiling, eye contact
- If parents have concerns about autism, you can start with ASQ:SE-2

Examples of new items:

Does your child try to show you things by pointing at them and looking back at you?

Is your child too worried or fearful? If “sometimes” or “often or always,” describe:

New design

- Design is similar to ASQ-3
- Black and white (no color) to facilitate photocopying
- Age range at top of 1st page
- Instructions at top of 2nd page
New design

- Lines added to right for scoring each item
- Tabbed dividers
- Sturdy box with handle

New scoring sheet

- Streamlined design
- New scoring line
- Area to record concerns
- Area to record follow-up actions
Item refinements

- Clearer wording
- More examples
- To improve accuracy of responses
- Based on research and user feedback

Change to response options

- Revised the positive response option
- To improve clarity and accuracy of answers
- *Does your baby laugh or smile at you?*

Prematurity

• Like ASQ-3, use adjusted age for children born 3 or more weeks premature
• Adjust until chronological age of 2 years
• Reasons for change
  • Norms and cutoffs were established using premature children whose ages were adjusted
  • Not correcting for prematurity may over-identify children with regulatory concerns that are a result of prematurity
  • Easier to implement both ASQ-3 and ASQ:SE with same guidelines

What stayed the same

• Completed by parents (or caregivers spending 15–20 hours a week with child)
• Scoring is the same (X = 10, V = 5, Z = 0; Concern = 5)
• 4th to 6th grade reading level
• Culturally sensitive
• Fast and easy – 10–15 minutes to complete; 1–3 minutes to score
• One-time purchase – photocopiable by single site
• Online management and completion available
