Integrating ASQ into Electronic Health Records

There are currently several options for health care providers interested in integrating the Ages & Stages Questionnaires®, Third Edition (ASQ-3™), and Ages & Stages Questionnaires®: Social-Emotional, Second Edition (ASQ:SE-2™) into electronic health records (EHRs).

- Automated transfer of data between Brookes Publishing's ASQ Online management system and EHR system with Application Programming Interface (API)
    - Requires subscription to ASQ Online
    - View information and pricing at www.agesandstages.com/asq-online-api
    - For a consultation on an individual basis regarding API connectivity to an EHR system, contact your sales representative at www.agesandstages.com/contact-us

- Manual export of ASQ-3 and ASQ:SE-2 scores from Brookes Publishing's ASQ Online management system and import into EHR system
    - Requires subscription to ASQ Online
    - Alternate child ID field in ASQ Online would match child's ID in EHR system

- Licensing to integrate ASQ-3 and/or ASQ:SE-2 questionnaire content into EHR system
    - Pricing varies based on practice size, planned functionality, and other factors
    - For information, contact your sales representative at www.agesandstages.com/contact-us

- Scan completed ASQ-3 and ASQ:SE-2 Information Summary Sheets and attach to a child's record in EHR system [*DOES NOT REQUIRE PERMISSION FROM BROOKES PUBLISHING*]

- Enter ASQ-3 and ASQ:SE-2 scores, or complete item responses, into fields in a child's record in EHR system [*DOES NOT REQUIRE PERMISSION FROM BROOKES PUBLISHING*]

- Subscribe to CHADIS®, the Child Health and Development Interactive System, a comprehensive web-based screening, diagnosis, and management system. CHADIS offers web-based ASQ-3 and ASQ:SE-2 questionnaire completion, automatic questionnaire scoring, and time-based graphical displays. CHADIS is integrated with Office Practicum and Allscripts TouchWorks, an interface with Centricity has been established, and intraoperability with EPIC is available on a site-by-site basis.

- Subscribe to Patient Tools®(PTI), an enterprise solution for electronic patient interviews for all age groups and specialties. PTI offers tablet (e.g., iPad, Android) and web-based ASQ-3 and ASQ:SE-2 questionnaire completion, scoring, trending across ASQ age groups, and in-depth reporting in real-time. ASQ questionnaires in Hmong and Somali are available in PTI. PTI's Data Exchange can be configured to interface to any EHR using HL7, ODBC, or file-based transfers of reports and discrete data fields.
