Reports Guide

An Inside Look at ASQ Online Reporting!

ASQ® Pro and ASQ® Enterprise enable users to generate a wide selection of reports for individual children, individual programs, and/or groups of children across multiple programs in an ASQ® Online account. The report generation page includes a number of search options for customizing reports (e.g., interval, date range). Many of the reports offer users the ability to include custom child profile fields and all child profile fields. Reports can be downloaded as PDF or CSV files (editable in Excel) or previewed in your browser.

ASQ Online has four pre-defined roles: Account Administrator (ASQ Enterprise accounts only), Program Administrator, Provider, and Reviewer. Account Administrators can view data for all of the programs in their account. Program Administrators in an ASQ Enterprise account can view data for their program; Program Administrators in an ASQ Pro account can view data for their account. Providers can view data for the children assigned to them. Reviewers can view data for the programs and children for which they have been provided access.

ASQ-3 Screenings Below Cutoff, by Area

ASQ:SE-2 Screenings Above Cutoff

Description: The ASQ-3 Screenings Below Cutoff, by Area Report shows the total number of finalized screens that fell below cutoff, indicating concern. The overall items section shows how many finalized screenings had at least one overall item marked for concern (Concern column) and finalized screenings that had zero overall items marked for concern (No Concern column).

The ASQ:SE-2 Screening Above Cutoff Report shows the number of finalized screens where family indicated concern as well as the number of finalized screens that scored above cutoff, indicating concern.

Screening Status Summary

Description: The Screening Status Summary Reports details the screening progress of all children within your account. For each child that has been screened, the report will list all of the screenings for the child, the date the child was screened, the questionnaire type and interval of the screening, and the name of the caregiver who completed the screening. The report shows when the screening was completed, if the screening is still in progress, or if a child has not yet had a screening completed. The report also allows users to show only the "Last Screening Completed" for the child.

Who has access to these reports?

Screening Tasks Status, by Date

Description: The Screening Tasks Status, by Date Report shows you all scheduled screening tasks for children, by program. For each child's screening task, it lists the date the task was due, the date the task was completed, and the date the screening was entered into the ASQ Online System. The report can be narrowed down by program, provider, or date range, depending on role.

Screening Usage, by Program

Description: The Screens Usage, by Program Report lists the number of users, number of child records, and number of screens used for each program within your account. You can customize the report to show the screening usage of a specific program, or choose to run the report on all programs within your account. You can also customize this report by a date filter, which allows you to narrow the report by quarter or date range.
