Online Questionnaire Completion with Family Access

- Online completion of ASQ®-3 & ASQ®:SE-2 questionnaires (Arabic, English, French, Spanish, Vietnamese)
- Secure website that organizations can customize with organization's logo and custom text
- Ability to link to Family Access webpage from organization's website
- Mobile-optimized website for easy completion on phones and tablets
- Option for completion of both ASQ-3 & ASQ:SE-2 from same webpage
- Ability to disable and reactivate webpage to prevent questionnaire collection
- Automated questionnaire interval selection
- Automated age adjustment for prematurity
- Automated scoring of questionnaires
- Collect the child and caregiver data needed for setting up profiles
- Customize the data collected from parents/caregivers
- Email screening invitations to parents/caregivers
- Email screening reminders to parents/caregivers
- Share learning activities on webpage after completed screenings
- Notifications for staff via text or email when questionnaires are submitted
- Ability to accept questionnaires and assign to existing child profiles
- Ability to accept questionnaires and create new child profiles
- Ability to reject submitted questionnaires (e.g., out-of-demographic area, too many skipped items)
- Option to auto-send email to parents/caregivers when questionnaires are rejected

Data Transfer with ASQ Automated Programming Interface (API)

- Automatically transfer the data between ASQ Online and your database
- Automatically update child and caregiver profiles
- Choose the type of data that transfers—screening data and/or child and caregiver demographic data
