

Screen More Children with **ASQ Online**

ASQ Online makes it easier to connect and communicate with families and involve them as partners. One major benefit is ASQ Online's Family Access option, which enables programs to send out ASQ questionnaires for families to complete electronically. When busy families can answer questionnaires on their own schedule, screening rates go up.

Programs love online questionnaires via Family Access!

"Most of our parents are digitally minded. Without the [ASQ Family Access] online screening option, **we would have much fewer parents** engaged in our program."—Kali Ottesen, director of Help Me Grow Utah

"Ultimately, the **convenience** of ASQ Family Access means **more families** are getting the results from their trusted pediatricians and therefore **more likely to get connected to resources**."—Courtney Gupta, Help Me Grow Care Coordinator, Oakland County, Michigan

"The online system is **much easier for the families** to complete—and makes it **easier for us to track child progress**, too."—Lauriston Thrush Avery, Five Mile River Nursery School

"We have a **broadier reach** now...we're comfortable embarking on a countywide public awareness campaign with a link to the online questionnaires, because we can process **many more screenings with much less staff time**."—Rebecca Hernandez, manager of Help Me Grow, Orange County, CA
